Hi Angela

I got a vmail from Marie last night asking to talk w me and Michelle on Tuesday (her next day back in the office), to explain her thinking on the funding changes. It makes me think it could be a big deal. Michelle W is going to set up a call for me, Marie and Michelle on this – would you like to be included? I think it would be good, if you can make the time.

Lucy

Hi,  
I like the addition of having EPA identify an internal desired outcome for each section. If you can get that info from each of the managers by early next week, it may help clarify what is most important to have Heather hear. For example, I don't know enough about Marie's DW funding structure issue to know how significant it is for Heather to hear – so maybe that could be swapped with the TMDL section. But it's also possible that it's a big enough change that Heather needs to be aware and hasn't been hearing anything about (compared to our ongoing conversations re the TMDL issues).

Thanks Michelle – looks really good (and meaty!)

A few thoughts...

I know it is not much time, but we could move my 5 min on PPA to the end of the meeting, to give 5 min to another topic during the morning section. At the end, I can talk about the path forward with respect to developing the next PPA document, (water as one chapter), including highlighting any additional discussions we want to have for close out and for developing new water chapter. Heather can miss that.

I think it would be important for Heather to hear the TMDL discussion – but I can't figure out what portions of the morning agenda we could skip. We could suggest that Sally T and Sage P attend for the Deschutes and Columbia River discussions... to cover for Heather on those items?

Please find attached an annotated version. There are still some gaps that I will need the unit managers to fill in. Running this by the two of you first though for your review, with a cc: to Dan.

Also, Heather will not be in attendance for the afternoon. So I am expecting to adjust the order based on her interest and need to participate. (I have asked for her input.) I would also appreciate your input on which topics you see as "Heather critical". Thanks, Michelle
